

Intern Level Software Engineer

Position Information

Employer:

QuickFlex Inc.

Division:

N/A

Title:

Intern Level Software Engineer

Description:

Intern Level Software Engineer, US Citizen Required,
Active DoD Security Clearances or Ability to Get Clearances

- * Want to work somewhere where your creativity and skills really matter?
- * Are you interested in helping to define the best-in-class solutions for leading-edge, innovative technologies?
- * Do you have a passion to see your ideas come to life?

If so, our growing company and development team may be right for you. We are seeking an Intern Level Engineer to help bring the latest in advanced security and decision engine technologies to market. In addition to being a member of the development team, where you will have the opportunity to show your superior coding skills and develop new ones, you will also have the opportunity advance innovative technical ideas.

You will be the person who has:

Education: Hours toward a B.S. in Computer Engineering or Computer Science

Years of Experience: Prior work experience desirable

Required:

- * Familiarity with the basics of software development
- * Familiarity with Windows and Ubuntu (or comparable Unix distribution)
- * Familiarity with Java
- * Familiarity with C/C++ or VHDL a bonus
- * Critical thinking ability with exceptional ability to learn new skills
- * Creativity and strong technical writing skills
- * Commitment to deliver tangible business results and not only code
- * A down-to-earth and friendly personality
- * Self-driven and capable of adhering to mid-to-long project schedules and an ability to meet deadlines early

Very Desirable:

- * GUI design and development
- * Decision engine technology with a strong math and statistics background

Desirable:

- * Security based applications including cryptography
- * Off-chip data storage (flash, DDR, etc.)
- * Mobile/Android development

How To Apply

Requested Documents:

- Resume
- Cover Letter

Note: Please send your resume and required cover letter in the body of the e-mail to resumes@quickflex.com. We will not accept any attachments. Please state that you are a US citizen in the cover letter.

Work will involve coordinating with a team to achieve development projects with a typical scope of 6-24 months. Your primary objective will focus around software development. This will include initial environment/repository set-up for project(s), working as a team to write and modify source code, providing status reports, and attending team meetings either via teleconference or in person. Work also includes researching, advancing, and brainstorming innovative software solutions to specific identified topics. Opportunities for long-term employment.

* Travel: Very Limited

* Location: Austin or San Antonio, TX, or Telecommute

* Compensation: DOE, Competitive

QuickFlex Inc. provides products and services in the development and support of high-performance, state-of-the-art, advanced, reconfigurable systems and circuit solutions, novel security protections, fault tolerant solutions, and sophisticated decision engines for embedded, desktop, and networking technologies. The Company's customers include the Federal government and market leading commercial customers. QuickFlex Inc. is an equal opportunity employer.

How to Apply:

Please send your resume and required cover letter in the body of the e-mail to resumes@quickflex.com. We will not accept any attachments. Please state that you are a US citizen in the cover letter. Candidates most closely meeting the requirements of the position will be contacted. Thank you for your interest in employment with our growing and dynamic company.
